

1. We come to innovate.

Our projects are our own creations, built with our ideas, hands, and effort.

2. We value learning over shortcuts.

Support, advice, and inspiration are welcome, but the real work must be done by us, the student innovators.

3. We respect originality.

Copying others' work is not innovation. We may explore references, but our final project is shaped by our own imagination and problem-solving.

4. We accept challenges.

Success is rewarding, but mistakes and set backs are stepping stones. Every failure teaches us something new.

5. We compete with fairness.

Winning is not about pulling others down, but about rising through our own skills, creativity, and teamwork.

6. We collaborate with respect.

We treat our teammates, other schools, and mentors with dignity. Ideas may differ, but respect remains constant.

7. We keep safety and responsibility first.

Every project must be safe for the team, the audience, and the environment. Care for tools, resources, and space is part of our discipline.

8. We welcome guidance, not shortcuts.

Mentors and coaches can explain, advise, or inspire –but not build or program on our behalf.

9. We share the spirit of innovation

Whether we win or not, we celebrate every idea, every effort, and every spark of creativity.

10. We battle to inspire

The true victory is not just a prize, but the ability to inspire ourselves and others to think, create, and innovate.
